NITTE ETHOS 5.0

INTERNATIONAL CONFERENCE

WHY DO YOU NEED ETHOS?

The purpose of the conference is to stimulate discussion, to juxtapose the reality of health science education with research from the perspective of healthcare educationists and the recipient.

This conference highlights various biomedical ethics topics and offers a forum for team and individual ethical thinking, debating, problem-solving and strategizing new solutions.

The pandemic delayed the planning of the event, but the past two years have shown why this topic is so crucial right now.

Opportunity for the faculty to present in an international forum, helping to gain points in 'Performance BASED ANNUAL ASSESSMENT', without going abroad

A unique opportunity for all students to add a special component to their CV, especially to all the international aspirants! The certificates from the event will add value in both academic and extracurricular fields

NITTE ETHOS 5.0 INTERNATIONAL CONFERENCE
